### DETAILED ACTION

1. Claims 1-4 are pending for the examination.

#### Claim Rejections - 35 U.S.C. § 102

2. The following is a quotation of the appropriate paragraphs of 35 U.S.C. § 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless --

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 1-4 are rejected under 35 U.S.C. § 102(b) as being anticipated by Kagami et al., US. patent 5,384,762 (hereafter Kagami).

As to claim 1, Kagami discloses the invention as claimed [see Figs. 1-5] including controlling means and transfer function holding means, comprising:

controlling means [fig. 1, unit 200] for performing seek control for moving said optical pickup to a target track on the optical disc and focus servo control of said optical pickup according to a detected focus error signal and a transfer function [col. 4, line 38 to col. 5, line 5]; and

transfer function holding means [fig. 1, unit 300] for holding a first transfer function for executing focus servo [col. 4, lines 3-26] when said controlling means does not perform said seek control [col. 2, lines 34-59; fig. 5A], and a second transfer function for executing focus servo when said controlling means performs said seek control [ABSTRACT; col. 2, lines 34-59; col. 4, line 50 to col. 5, line 37].

3. The aforementioned claim 2, recites the following elements, inter alia, disclosed in Kagami:

said second transfer function has smaller gain than the first transfer function and a phase margin capable of providing substantially same stability as that obtained by said first transfer function [col. 5, lines 14-58].

4. As to claim 3, it is rejected for similar reasons set forth in the rejection of claim 1, supra.

As to added limitation Kagami discloses:

an optical pickup [fig. 2, units 30,38, 40 etc.]for writing data on to an optical disc [fig. 2, unit 100] and/or reading data form the optical disc [col.3, lines 23-53];

5. As to claim 4, it is rejected for same reasons set forth in the rejection of claim 1, supra.

6. Applicant's arguments with respect to claims 1-4 have been considered but are moot in view of the new grounds of rejection.

#### **Other prior art cited**

7. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.
